APCS2
Straight

12.5 x 11.0 cm

The straight connector (APCS2) is used when the spigot outlet on the WC is in line with the SWR pipework system.

APCC2
Collapsible

12.5 x 11.0 cm

The flexible connector (APCC2) is extendable from 22.5 to 55.0 cm and is very useful when the SWR pipework is at a significant distance from the WC spigot outlet or if it is in a vertical position.

APC02
1.8 cm
Offset

APC04
4.0 cm
Offset

12.5 x 11.0 cm

12.5 x 11.0 cm

The two ranges of offset connectors (APC02 and APC04) are useful if there is a mismatch between the centres of the spigot on the WC and the SWR pipework. Offsets of up to 4.0 cm can be catered to, by these two WC pan connectors.

STUDOR

Active Drainage Ventilation System

Studor P.A.P.A. (Positive Air Pressure Attenuator) and Studor Air Admittance Valves (AAVs) provide a complete Active Drainage Ventilation solution, which is particularly suited to high – rise applications.

An active ventilated system provides relief at the Point Of Need (PON) by removing or attenuating an incoming pressure transient that, if left, could lead to trap depletion.

The combination of the P.A.P.A., Maxi – Vent and Mini – Vent AAVs support a complete system to limit pressure fluctuations, guaranteeing the integrity of the traps.
